OPERATING
&
FILTER REPLACEMENT
DIRECTIONS

TO BEGIN USING YOUR AIRPURA

Inspect the exterior of your Airpura to verify there is no damage from shipping. If any damage is noted, please follow the instructions from the distributor returns policy.

Wipe the unit with a damp cloth to remove any dust from packaging

Plug the unit into a regular grounded 110 volt outlet

Turn on the unit to MAX and allow it to run for at least 30 minutes

Set the variable speed control to the level you wish

The most efficient way to use your Airpura for regular air quality maintenance is to run it at a low speed **24 hours a day 7 days a week.**

Always maintain a humidity level of approximately 40% to ensure the unit is operating at optimal levels. When using purifier with a dehumidifier, please keep dehumidifier at least 6 feet away.

Poly Prefilter 600 2-pack
12 months

26 lbs Coconut Shell Carbon filter C600
24 months

HepaBarrier 600CT Filter (95% efficient @ 1 Microns)
12-16 months

FILTER MAINTENANCE AND REPLACEMENT

The Prefilter

Can be vacuumed from the exterior of the unit once a month or more often. Should be replaced at least after 12 months of use

To vacuum the Prefilter

Use the brush attachment on your vacuum cleaner
Vacuum slowly around the mesh surface of the filter chamber

IMPORTANT SAFETY NOTE

Please ensure air purifier is turned OFF when plugging into a power source. Failure to do so may result in motor potentially stalling and/or burning.
